SUMMARY

Computer Science graduate (B.S., May 2026, Magna Cum Laude) with hands-on experience in programming, debugging, and technical support. Comfortable across Windows, macOS, and Linux, with a strong eye for detail and a knack for finding root causes, documenting fixes, and explaining them clearly to any audience.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, C++

Operating Systems: Windows, macOS, Linux

Tools & Platforms: Git/GitHub, Jira, PostgreSQL, Microsoft Excel, Word, PowerPoint

Troubleshooting & Support: Hardware/software troubleshooting, root-cause diagnosis, debugging, technical documentation, ticketing and escalation workflows, remote assistance

Professional: Customer service, business communication, attention to detail, time management, working in fast-paced environments

EDUCATION

University of Maryland, Baltimore County

Spring 2026

B.S. Computer Science | GPA: 3.77 / 4.00 | Magna Cum Laude

Relevant coursework: Operating Systems, Computer Architecture, Computer Organization & Assembly, Data Structures, Algorithms, Discrete Mathematics, Automata Theory, Probability & Statistics

Community College of Baltimore County

August 2024

A.A.S. Computer Science | GPA: 3.60 / 4.00

Relevant coursework: C++ Programming, OO Design, Statistics, Calculus I & II, Linear Algebra

CERTIFICATIONS

CompTIA Security+

PROJECTS

Vending Machine Inventory System

Software Engineering Course, UMBC

- Built a full-stack inventory management system for vending machine stock using React.js on the front end and PostgreSQL for data storage.
- Implemented stock-level tracking and automated restocking logic that flags low-inventory items, backed by a relational database schema and a clean interface. Coordinated group tasks through Jira.

EXPERIENCE

Teaching Assistant, Computer Science Department — UMBC

Aug 2025 – Dec 2025

- Gave one-on-one and group technical support to students troubleshooting C++ programs, debugging errors, and fixing development environment issues.
- Diagnosed root causes of coding and logic errors and walked students through fixes step by step in clear, non-technical terms.
- Advised students on version control (Git), coding best practices, and structured problem-solving.

Warehouse Associate — Amazon

Apr 2023 – Jul 2025

- Used computerized tracking systems, barcode scanners, and handheld printers to keep inventory data accurate in a high-volume logistics operation.
- Prioritized work and analyzed workflow to process high order volumes within tight deadlines.
- Found fulfillment discrepancies through root-cause analysis and recommended process improvements to supervisors.

Administrative Assistant Intern — Chesapeake Gateway Chamber of Commerce

Jun 2022 – Aug 2023

- Analyzed marketing campaign performance data and summarized findings in written and oral reports for leadership.
- Produced video and graphic assets with Adobe Creative Suite and coordinated schedules and resources across multiple events.
- Kept stakeholders updated on project status and recommendations, consistently meeting deadlines in a professional office environment.
